

SWIFT THINKING UNDERGRADUATE PSYCHOLOGY NEWSLETTER FALL 2024

PLANNING FOR WINTER 2025

A table showing our course offerings for <u>WINTER 2025</u> is available online. The table includes information on meeting days and times. In addition, it indicates which major and minor requirements each course can fulfill, whether a course is available for pre-registration, and whether you need permission to enroll.

IN THIS ISSUE

- Planning for Winter 2025
- Pre-registration
- Registering for Psych 205
- Statistics Tutorial Resource
- Research
 Courses
- Special Courses for Winter 2025
- Applying For Honors
- UPA News
- Psychology
 Advising
- People to Know!
- Petition to
 Graduate

PRE-REGISTERING FOR WINTER COURSES

(Please check this table and the <u>Registrar's website</u> for updates.)

The Psychology Department will offer pre-registration through CAESAR for most of our Winter Quarter courses the week prior to regular registration. All students listed as psychology, cognitive science, or neuroscience majors or minors in the Registrar's system should be able to pre-register through CAESAR for these courses. The only courses not available for pre-registration for Winter Quarter are the PSYCH 101, PSYCH 110, and the PSYCH 397/398/399 research courses.

Pre-registration times are announced by the Registrar's Office. Students can preregister for a maximum of <u>two</u> courses.

WAIT LISTS

Psychology courses are very popular and they often close during registration. If a course you want to take has closed, use the electronic wait list function* on CAESAR. As students drop and seats become available, instructors will fill open seats with permission numbers.

Wait lists will be monitored until the last business day before classes begin.

REGISTERING FOR PSYCH 205 - RESEARCH METHODS

Students who are sophomores and beyond, and who are listed in CAESAR as majoring or minoring in psychology, cognitive science, or music cognition may pre-register for PSYCH 205. Make sure you have the statistics prerequisite or an allowed <u>substitution</u> before you enroll. You **may not** take both PSYCH 205 and the statistics prerequisite during the same quarter. Wait lists for Psych 205 are managed by the Undergraduate Program Assistant, and questions should be directed to Psychology Advising.

Students who are using an AP Stats credit substitution: Caesar does not recognize this approved substitution and it will block your registration. *Please email psych-advising@u.northwestern.edu to obtain a permission number to register for Psych 205.*

STATISTICS TUTORIAL RESOURCE AVAILABLE

We have a Canvas course with Statistics Tutorials for Psychology students. The site is open to any student at Northwestern who would like to be able to use the resource. It currently has video tutorials on most of the topics covered in Psych 201-Statistics, some more advanced topics, as well as some videos on using SPSS.

All of our current majors and minors should have already been added to the Canvas site. If you have not been added but would like to access the resources, contact psych-advising@u.northwestern.edu. Provide your NetID and request to be added to the Statistics Tutorials Canvas site.

RESEARCH COURSES REQUIRING DEPARTMENT AND INSTRUCTOR PERMISSION

PSYCH 397-1, 397-2, and 399

A great way to learn more about psychological research is to become actively involved in research activities through PSYCH 399-Independent Study or the two-quarter PSYCH 397-Advanced Supervised Research series. This is especially valuable for students considering graduate study in psychology and it can be an educational and enjoyable experience for others as well.

PSYCH 397 and 399

You can count at most 1 quarter of 397-1 or 399 toward the major. You cannot count both courses toward the major requirements. PSYCH 205-Research Methods in Psychology is a prerequisite for PSYCH 397. The second quarter of the Advanced Supervised Research sequence, PSYCH 397-2, fulfills the upper-level research requirement for the psychology major. For more information on 397 and 399, including the differences between them, how they count toward requirements, and tips on finding a research adviser, see our webpage on "Research for Course Credit."

To enroll in PSYCH 397 or PSYCH 399, download the <u>application</u>, fill it out, and have it signed by the professor with whom you will be working. Then, email the form to the Undergraduate Program Assistant at <u>psych-advising@u.northwestern.edu</u> and a student-specific permission number will be generated. Please note that you must turn in your application and register for the course through CAESAR by **Thursday**, **January 9th**, **2025**.

We cannot guarantee that an application submitted on the final day of the add period can be reviewed in time to generate a permission number before the add deadline. Students will need to obtain permission for the late addition of a course from the Dean's Office in this situation

Psych 330:Special Topics in Cognitive/Neuroscience: Cognition and Mathematics

• Professor Lance Rips

This class examines how children and adults learn about numbers, beginning with simple skills involved in estimating quantities. The class traces people's learning of the integers, rationals, and reals, and it focuses on how people understand mathematical infinity.

Psych 383: Psychology and Food

Professor Sara Broaders

This course will explore the psychology of food and eating. We'll look at evolutionary, social, cultural, cognitive, and biological perspectives on eating behavior and food choice. Among the issues that we'll explore are: why we eat, what we eat, how much we eat, what we won't eat, and why we sometimes eat too much. Since this is an upper-level research course, we will focus on psychological theories, methodological issues, and empirical research in this area. Students will also engage in designing, conducting, analyzing, and writing up an empirical research project during the quarter. *NOTE: We will NOT be covering eating disorders. This course is about normal processes and influences on eating behavior and food choice.*

Psych 390: Advanced Seminar in Personality, Clinical, or Social Psychology: Psychology of Inequality

Professor Michael Kraus

In our world, resources and opportunities have been distributed unequally across time and context. Why does inequality so fundamentally shape our social reality?; why does it seem to persist against efforts to bring about equity and justice?; and how is our psychology involved in this process? This seminar is designed to accomplish two goals: (1) to provide an empirical and historical knowledge base that will help you generate your answers to these questions; and (2) to better understand how social psychologists study inequality. To accomplish these two goals, we will use readings, discussions, activities, and brief written assignments to develop our understanding of inequality, and its roots in fundamental aspects of our lives and psychology.

APPLYING FOR HONORS

Do you enjoy conducting psychological research? When you read your textbooks or attend psychology classes, do you think of new research questions that you'd like to address? The Psychology Honors Program provides an opportunity for senior psychology majors to explore a research topic in detail under the guidance of a faculty member. In addition, participants discuss current psychological issues and research questions with other outstanding students.

Students interested in participating in the Psychology Honors Program apply in Spring of their Junior Year. While the application isn't due for several months, it's never too early to start thinking about whether this is something you'd like to pursue. In particular, now is a good time to become involved in research with a faculty member to ensure you have a potential honors advisor lined up by the time the application rolls around in Spring!

The Psychology Honors Program is an exciting, intellectually challenging, and worthwhile experience. However, while participating in the honors program is usually a wonderful opportunity, it is not for everyone. You really have to enjoy psychological research and be willing to work hard on your project throughout the academic year. Before you apply to the program, think about whether you will have the time and the motivation to complete a project of this magnitude. Please feel free to talk with the honors coordinator Sandra Waxmand (<u>s-waxman@northwestern.edu</u>) if you have guestions.

More information regarding the honors program can be found Here.

UNDERGRADUATE PSYCHOLOGY ASSOCIATION (UPA) NEWS

The Undergraduate Psychology Association (UPA) is a group of students who share a passion for exploring Psychology. UPA welcomes students of all majors to participate in academic, career-oriented, and social events during the school year. Our primary goals are to help undergraduate students learn more about psychology in a non-classroom setting, foster student-faculty communications, and facilitate the awareness of professional opportunities related to psychology. If you have any questions or are interested in joining UPA, you can reach us at upa@u.northwestern.edu and follow our Instagram (@nu_upa).

PSYCHOLOGY DEPARTMENT ADVISING

Advisors

- Prof. Sara Broaders
- Prof. Ben Gorvine
- Prof. Ginger Pennington

- Prof. H. David Smith
- Prof. Michael Bailey
- Prof. Wendi Gardner

APPOINTMENTS

To make an appointment with any undergraduate advisor, send an email message to <u>psych-advising@u.northwestern.edu</u>; include the following information:

Name: ID #: Class Year: Majors/Minors: Reason for meeting: (Example: Major or minor declaration, Petition to graduate, course questions, Study abroad etc.) Email:

The Undergraduate Program Assistant, Chris Kent, is the person to contact for routine matters such as officially declaring a major or minor, scheduling an advising appointment, or submitting an application for Psych 399-Independent Study or Psych 397-Advanced Supervised Research. They can also answer some questions about our undergraduate program. You can reach them via email at psych-advising@u.northwestern.edu.

People to Know!

Chris Kent (They/Them) Undergraduate Program Assistant

- Advising appointments
- Permission numbers
- Major/Minor Declarations
- Assistance with questions concerning courses and other aspects of the undergraduate program

Office: Swift Hall 102 Email: psych-advising@u.northwestern.edu

Charlotte (She/Her) Participant Pool Coordinator

- Coordinates student research assignments for Psych 110
- Coordinates the paid participant registry
- for psychology studies at NorthwesternManages the Paticipant pool and paid registry website

Office: Swift Hall 102 Email: charlotte.cagliostro@northwestern.edu

PETITION TO GRADUATE

All Northwestern undergraduates must complete and submit Graduation Petitions **one year prior to their intended graduation date.** The latest to submit the petition is two quarters before you anticipate graduating (e.g., before the end of Fall quarter if you expect to graduate in Spring quarter, and during Spring quarter if you plan to graduate in Fall quarter). <u>You must schedule an advising meeting with a department</u> <u>advisor before your Petition to Graduate can be signed/approved.</u> You can set up an appointment with one of the department advisers by emailing psych-advising@u.northwestern.edu. *Please include: Full name,

Student ID #, Year, Psych Major/Minor/other, Reason (to match with advisor).* Email

Completing your Graduation Petition on time ensures you are on appropriate graduation lists and that you, your adviser, and the Registrar's Office agree on what requirements you have left to complete. It also provides an opportunity to talk about your experiences in the department thus far and your plans for the coming year and beyond.

You can read more about the petition process, including submission deadlines and access petition forms, on the Registrar's website. A good place to start is the <u>Registrar's Graduation Page</u>.

Graduation Petition Deadlines	
Graduation Quarter	Deadlines
Fall quarter 2024	June 1, 2024
Winter quarter 2025	October 8, 2024
